PRANAV MURALI

Kerala, India | prnvmrli@gmail.com | 9447990331 | Portfolio | LinkedIn | GitHub

Professional Summary

Mobile Software Engineer with nearly 5 years of experience building production software, specialising in Flutter, mobile architecture, SDK engineering, and performance-critical systems. Experienced in developing reusable mobile foundations and real-time systems for financial platforms, with a focus on reliability and scalability.

Technical Skills

Languages & Frameworks: Dart · Flutter · React · JavaScript · TypeScript · Python · HTML/CSS

Architecture & Mobile Systems: Clean Architecture · BLoC · Modularization · Monorepos (Melos) · SDK Development

Networking & Integration: REST APIs · WebSockets · Firebase

AI Tooling & Workflows: AI-assisted SDLC · Local LLMs · Ollama · MCP · Agent Skills

Testing & Delivery: Git · Integration Testing · Patrol · Azure Pipelines · GitHub Actions · Build Automation · App Store Releases

Professional Experience

Software Engineer, *IOURING Private Limited, Chennai, India* Oct 2022 - Present

- Guided architectural decisions and implementation practices across the Flutter team, providing technical guidance and conducting code reviews to maintain code quality and consistency.
- Developed and maintained 3+ cross-platform Flutter applications for financial products, supporting multi-client integrations and white-label deployments.
- Developed Flutter SDKs and maintained shared Dart/Flutter libraries, enabling code reuse and consistent implementations across applications.
- Applied BLoC and Clean Architecture principles to build modular, maintainable, and testable application codebases.
- Integrated REST APIs, WebSockets, and Firebase services for backend communication, real-time market data, and push notifications.
- Profiled and optimized Flutter application performance, addressing rendering, gesture handling, and responsiveness challenges in complex interfaces.
- Integrated native Android SDK components into Flutter applications to support platform-specific functionality.
- Contributed to automated testing and CI/CD workflows, using Azure Pipelines and GitHub Actions for Flutter builds, signing, and application releases.

Software Engineering Intern, *IOURING Private Limited, Chennai, India* Jan 2022 - Sep 2022

- Developed and maintained 2+ web applications using React, Redux, and Material UI.
- Helped build Flutter UI components and integrate backend REST APIs.

Selected Engineering Projects

NeoCharts | IOURING: Flutter charting SDK for financial trading platforms, featuring interactive charts, technical indicators, real-time market data, and performance-critical rendering.

NxtOption | IOURING: Options trading platform with real-time option-chain data, strategy analysis, and interactive trading workflows.

Aviary | Open Source · Infrastructure: Self-hosted private Dart package registry with token-based access control and caching for enterprise Flutter/Dart package distribution.

F-Cleaner | Open Source · Flutter Desktop: macOS disk cleanup utility built on a reusable Dart CLI engine, featuring asynchronous filesystem traversal, reactive disk analysis, and native Swift/WidgetKit integration.

android_system_chrome | Open Source · Flutter Plugin: Flutter plugin for Android system bar customization and edge-to-edge styling.

flutter_notification_icons | Open Source · Flutter Package: Flutter package for dynamic Android notification icon resolution and tinting.

Education

B.Tech in Mechanical Engineering *2016 - 2020*

Government Engineering College, Idukki, Kerala, India
